TECHNICAL FEATURES

**Premium Components**

- Twin viton seals with stainless steel 316L shield.
- Removable hollow shaft with key for safe torque transmissions.
- Fully modular IEC flanges and compact NEMA C motor flanges.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions. 
- Housing with special smooth surfaces.
- Hardened and ground gears.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L. 
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
- Input coupling
- Housing with special smooth surfaces.
- Removable hollow shaft with key for safe torque transmissions.
- All stainless steel 316L hardware.
- Removable hollow shaft with key for safe torque transmissions.
- Output shaft is produced in AISI 316L.
- Special cover assures full protection of oil seals.
- Removable hollow shaft with key for safe torque transmissions.
